boilers and water heaters

Product Info

Magnetic Filter

- A high performance in-line system filter
- Ideal for use in restricted spaces
- Easy to fit – multiple orientation capability
- Fast easy clean without dismantling unit
- Removes system contaminants
- Fits vertical and horizontal pipe work
- Will not block or restrict flow

System Protector

- Works with filter
- protects the system against corrosion debris
- Fernox Protector with dispersant
- aids the safe collection of magnetite to a filter
- Prolongs the life of the boiler, pump & heat exchanger
- Designed to be left in the system permanently
- Prevents scale and corrosion formation
- Innovative, best-in-class formulation

Siemens Rev 13 Thermostat

- 24 hour room temperature controller
- Operating mode selection;
- Automatic mode with two heating phases
- Automatic mode with one heating phase
- Continuous energy saving mode
- Continuous comfort mode
- Automatic modes with time switch program
- Heating zone control

Radiant Easy Remote

- Possibility to set the boiler from remote.
- Remote for management and operation
- Large LCD-display
- Check and change the set values at any time
- After installing immediately ready to run
- Supports anti-frost function

Siemens RDS110

- Remotely monitor and manage temperature
- Remotely monitor and manage energy use
- Equipped with patented self-learning
- Operation mode switchover contact
- Remote room temperature sensor
- Floor temperature sensor
- Outside air temperature sensor
- Remote humidity sensor

Radiant Cloudwarm

- High Precision and speed
- World leading chip ensure its excellent performance
- Outstanding stability, and notably energy saving.
- Auto lower temp at night for good sleep & health
- Control anytime anywhere
- Easy operation, slide fingers on phone to change temp
