RADIK KLASIK

Description

RADIK KLASIK model is a steel panel radiator in KLASIK version which allows **left or right side connection** to the heating system circuit. It is intended for heating systems which are gravity or pressure fed.

Two upper and lower hangers are welded at the back of the radiator. Radiators 1800mm long and longer have six welded hangers.

Overview of types

Technical data

Height H	300, 400, 500, 600, 700, 900 mm
Length L	400, 500, 600, 700, 800, 900, 1000, 1100, 1200, 1400, 1600, 1800, 2000, 2300, 2600, 3000 mm
Connecting pitch	$h = H - 54$ mm
Connecting thread	4 × G1/2" inside
Highest allowed working pressure	10 bar
Highest allowed working temperature	110 °C
Radiator connection	left or right side

Type 10

Type 11

Type 20

Type 21

Type 22

Type 33

Examples of connection to the heating system

side - one side
 $\varphi = 1$

side - two sides diagonal
 $\varphi = 1$
recommended for: $L \geq 3 \times H$

side - two sides direct
 $\varphi = 0,9$

SATIN GLOSS

HIGH GLOSS

MATTE

DEEP MATTE

PLAN SET / LINE SET - available versions of detachable front panels

The models RADIK can be complemented with a new front panel in the version PLAN or LINE in basic white RAL 9016. Front panels are available also in other colours from RAL colour range with an extra charge. For more information see please www.korado.com or our technical brochure.

PLAN SET

LINE SET

Notice:

The colour of the radiator may vary in comparison with the colour shown in the colour card.

The standard paint finish is RAL 9016, other colours from KORADO colour range with an extra charge 30 %. Radiators can be ordered also in other colours from RAL colour range with an extra charge 40 %.

RADIK PLAN KLASIK, LINE KLASIK

Description

RADIK PLAN KLASIK (RADIK LINE KLASIK) is a steel panel radiator in KLASIK version and in PLAN (LINE) version which allows **left or right side connection** to the heating system circuit. It is intended for heating systems which are gravity or pressure fed.

Two upper and lower hangers are welded at the back of the radiator. Radiators 1800mm long and longer have six welded hangers.

Technical data

Height H	300, 400, 500, 600, 700, 900mm
Length L	400, 500, 600, 700, 800, 900, 1000, 1100, 1200, 1400, 1600, 1800, 2000mm
Connecting pitch	$h = H - 54$ mm
Connecting thread	4 x G1/2" inside
Highest allowed working pressure	10 bar
Highest allowed working temperature	110 °C
Radiator connection	left or right side

Examples of connection to the heating system

side - one side
 $\phi = 1$

side - two sides diagonal
 $\phi = 1$
recommended for: $L \geq 3 \times H$

side - two sides direct
 $\phi = 0,9$

Overview of types

Type 11 PLAN/LINE

Type 21 PLAN/LINE

Type 22 PLAN/LINE

Type 33 PLAN/LINE

SATIN GLOSS

HIGH GLOSS

MATTE

DEEP MATTE

PLAN SET / LINE SET - available versions of detachable front panels

The models RADIK can be complemented with a new front panel in the version PLAN or LINE in basic white RAL 9016. Front panels are available also in other colours from RAL colour range with an extra charge. For more information see please www.korado.com or our technical brochure.

PLAN SET

LINE SET

Notice:

The colour of the radiator may vary in comparison with the colour shown in the colour card.

The standard paint finish is RAL 9016, other colours from KORADO colour range with an extra charge 30 %. Radiators can be ordered also in other colours from RAL colour range with an extra charge 40 %.

RADIK VKM8

Description

Model **RADIK VKM8** is a panel radiator in version VENTIL KOMPAKT which allows **bottom middle or bottom right connection** to the heating system. The types 20, 21, 22 and 33 have the same distance of the bottom middle connection from the wall. There are two upper and two lower hangers welded to the back side of the radiator, the radiators with length of 1800mm and more are equipped with six welded hangers.

The panel radiators RADIK VKM8 are designed as modern components of the heating systems with forced circulation of the heating media and with horizontal distribution pipes located below the radiators in the floor, in the wall or along the wall and covered with decorative strips.

Overview of types

Type 10 VKM8

Type 11 VKM8

Type 20 VKM8

Type 21 VKM8

Type 22 VKM8

Type 33 VKM8

Technical data

Height H	300, 400, 500, 600, 700, 900 mm
Length L	400, 500, 600, 700, 800, 900, 1000, 1100, 1200, 1400, 1600, 1800, 2000, 2300, 2600, 3000 mm
Depth B	
Type 10 VKM8	47 mm
Type 11 VKM8	63 mm
Type 20 VKM8	66 mm
Type 21 VKM8	66 mm
Type 22 VKM8	100 mm
Type 33 VKM8	155 mm
Connecting pitch h	50 mm
Connecting thread	8x G 1/2" inside
Highest allowed working pressure	10 bar
Highest allowed working temperature	110 °C
Radiator connection	middle connection right bottom

Examples of connection to the heating system

middle connection
 $\varphi = 1$

right bottom
 $\varphi = 1$
(more examples of other way
connection see on page 6)

WAYS OF CONNECTION TO THE HEATING SYSTEM

Basic ways of connection

27 possibilities of connection with hangers

27 possibilities of connection with hangers

48 possibilities of connection without hangers

27 possibilities of connection with hangers

Examples of other ways of connection

RADIK PREMIUM

Description

The model **RADIK PREMIUM** is a vertically aligned radiator. The dimensions of this model make it ideal for use in tight or atypical rooms. Its design enables it to be connected primarily from the **middle bottom or side bottom** to a pressurised heating system. Alternatively, you can also use its top middle and top side connections. There are no hangers welded on the back side therefore the radiator is supplied with special brackets, guaranteeing an easy, fast and safe mounting. Apart from type 10, all other radiator types come fitted with side covers.

For connecting to the heating system we recommend using the Integrated Fitting HM supplied with a thermostatic head. For an alternative upper connection it is necessary to use a valve with a thermostatic head with a remote sensor, so that the thermostatic head is not directly affected by the radiator.

Technical data

Height H	1600, 1800, 2000, 2200 mm
Length L	400, 500, 600, 700 mm
Depth B	
Type 10	47 mm
Type 11	47 mm
Type 20	77 mm
Type 21	77 mm
Type 22	100 mm
Connecting pitch	50 mm
Connecting thread	6 x G1/2 inside
Highest allowed working pressure	10 bar
Highest allowed working temperature	110 °C
Radiator connection	middle bottom, side bottom, middle top, side top
Resistance coefficient	
Type 10, 11	$\xi_T = 8$
Type 20, 21, 22	$\xi_T = 12$

Examples of connection to the heating system

Overview of types

* It is necessary to use a thermostatic head with remote control (remote sensor).

RADIK PLAN PREMIUM

Description

The model **RADIK PLAN PREMIUM** is a vertically aligned radiator **with a flat front panel**. The dimensions of this model make it ideal for use in tight or atypical rooms. Its design enables it to be connected primarily from the **middle bottom or side bottom** to a pressurised heating system. Alternatively, you can also use its top middle and top side connections. There are no hangers welded on the back side therefore the radiator is supplied with special brackets, guaranteeing an easy, fast and safe mounting. All radiator types are fitted with side covers.

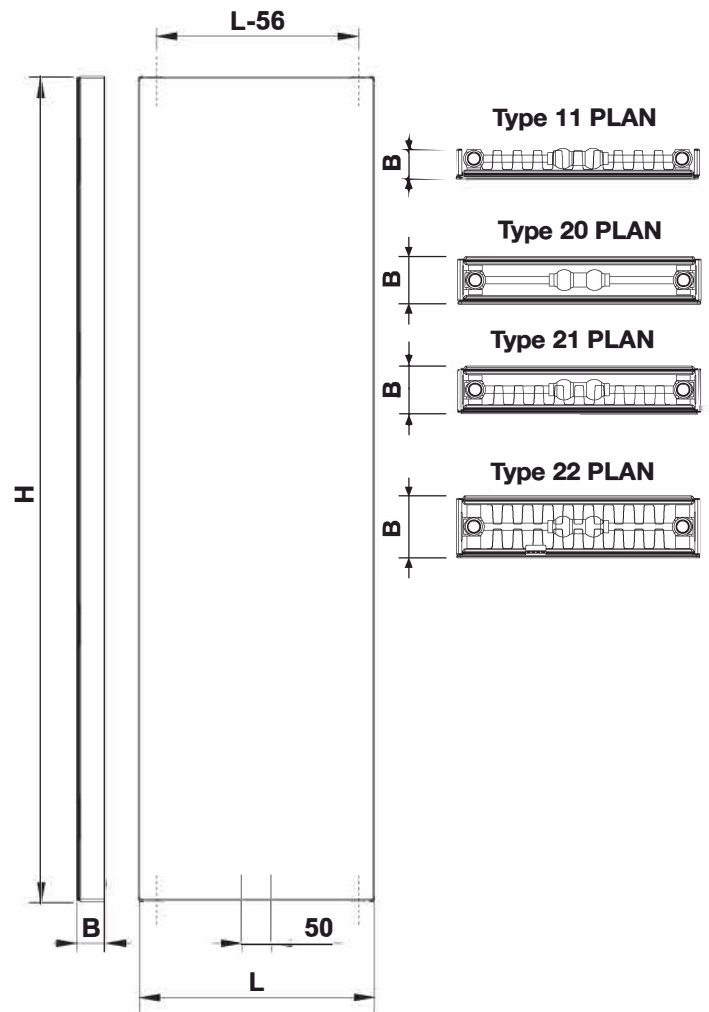

For connecting to the heating system we recommend using the Integrated Fitting HM supplied with a thermostatic head. For an alternative upper connection it is necessary to use a valve with a thermostatic head with a remote sensor, so that the thermostatic head is not directly affected by the radiator.

Technical data

Height H	1600, 1800, 2000, 2200 mm
Length L	400, 500, 600, 700 mm
Depth B	
Type 11 PLAN	49 mm
Type 20 PLAN	79 mm
Type 21 PLAN	79 mm
Type 22 PLAN	102 mm
Connecting pitch	50 mm
Connecting thread	6 x G1/2 inside
Highest allowed working pressure	10 bar
Highest allowed working temperature	110 °C
Radiator connection	middle bottom, side bottom, middle top, side top
Resistance coefficient	
Type 11	$\xi_T = 8$
Type 20, 21, 22	$\xi_T = 12$

Overview of types

Examples of connection to the heating system

* It is necessary to use a thermostatic head with remote control (remote sensor).

RADIK LINE PREMIUM

Description

The model **RADIK LINE PREMIUM** is a vertically aligned radiator **with a flat front panel with fine vertical grooves**. The dimensions of this model make it ideal for use in tight or atypical rooms. Its design enables it to be connected primarily from the **middle bottom or side bottom** to a pressurised heating system. Alternatively, you can also use its top middle and top side connections. There are no hangers welded on the back side therefore the radiator is supplied with special brackets, guaranteeing an easy, fast and safe mounting. All radiator types are fitted with side covers.

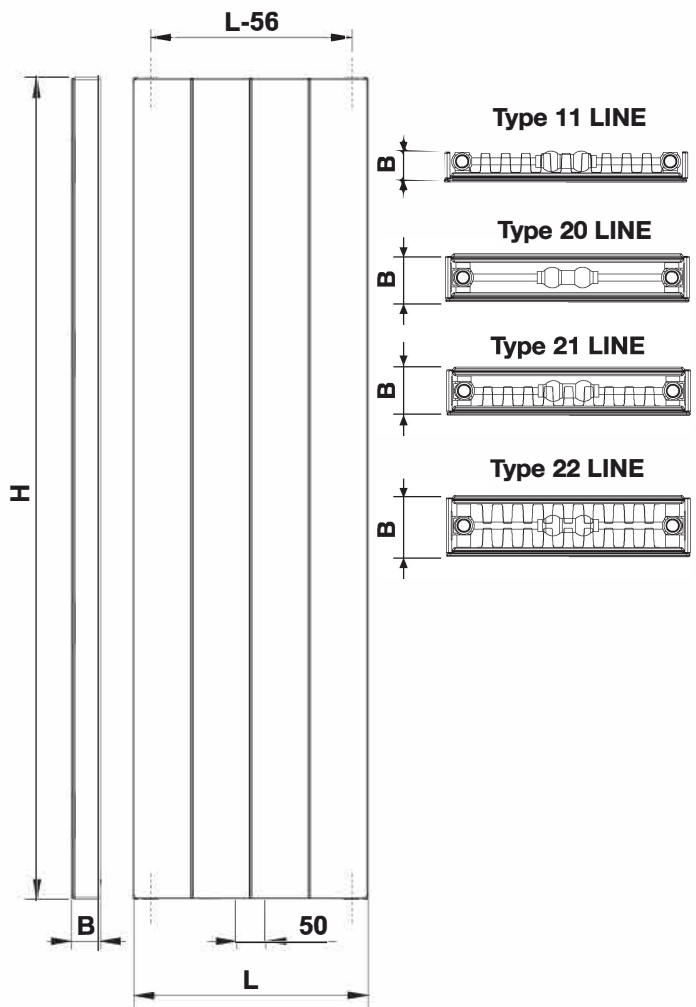

For connecting to the heating system we recommend using the Integrated Fitting HM supplied with a thermodynamic head. For an alternative upper connection it is necessary to use a valve with a thermodynamic head with a remote sensor, so that the thermodynamic head is not directly affected by the radiator.

KORALUX LINEAR CLASSIC, LINEAR CLASSIC - M

Technical Data

Height H	700, 900, 1220, 1500, 1820 mm
Length L	450, 500, 600, 750 mm
Depth B	30 mm
Connecting pitch (KLC)	$h = L - 30$ mm
Connecting pitch (KLCM)	50 mm
Connecting thread (KLC)	4 x G 1/2 inside
Connecting thread (KLCM)	6 x G 1/2 inside
Highest allowed working pressure	10 bar
Test pressure	13 bar
Maximum water temperature	110 °C
Flow coefficient (KLC)	$A_T = 2,1 \times 10^{-4} \text{ m}^2$
Flow coefficient (KLCM)	$A_T = 7,1 \times 10^{-5} \text{ m}^2$
Coefficient of resistance (KLC)	$\xi_T = 1,8$
Coefficient of resistance (KLCM)	$\xi_T = 16,0$

Design

KORALUX LINEAR CLASSIC (KLC) is a towel rail radiator with **bottom connection from the bottom down** with connecting pitch **h** derived from its length **L**. The design of the radiator also allows for **double sided connection from the top down**.

KORALUX LINEAR CLASSIC - M (KLCM) is a towel rail radiator modified for **bottom middle connection** with a connecting pitch of 50 mm.

Steel tubes $\varnothing 20$ mm
Steel profile 40 x 30 mm

Fitting

The mounting set is delivered as standard and consists of 4 special plastic brackets, screws, dowels and assembly instructions.

Type of Connection KORALUX LINEAR CLASSIC

Type of Connection KORALUX LINEAR CLASSIC - M

*For radiators with the bottom middle connection you can use the integrated connection fittings HM delivered together with a thermostatic head (see page 39).

The company reserves the right to make technical changes.

KORALUX LINEAR EXCLUSIVE - M

Technical Data

Height H	900, 1220, 1500, 1820 mm
Length L	450, 600, 750 mm
Depth B	30 mm
Connecting pitch	50 mm
Connecting thread	6 x G 1/2 inside
Highest allowed working pressure	10 bar
Test pressure	13 bar
Maximum water temperature	110 °C
Flow coefficient	$A_T = 7,1 \times 10^{-5} \text{ m}^2$
Coefficient of resistance	$\xi_T = 16,0$

Design

KORALUX LINEAR EXCLUSIVE - M (KLXM) is a chrome towel rail radiator modified for **bottom middle connection** with the connecting pitch of 50 mm.

Steel tubes $\varnothing 22 \text{ mm}$
 Steel profile 40 x 30 mm

Fitting

The delivered set for mounting on the wall contains 4 pcs of special plastic brackets in chrome, screws, dowel plugs and mounting instructions.

Type of Connection KORALUX LINEAR EXCLUSIVE - M

* For radiators with the bottom middle connection you can use the integrated connection fittings HM delivered together with a thermostatic head (see page 39).

Design

KORATHERM AQUAPANEL-E (KAE) are models of a design range of electric direct radiators with horizontally aligned bars without an integrated temperature regulator.

KORATHERM AQUAPANEL-ER (KAER) are models of a design range of electric direct radiators with horizontally aligned bars with an integrated temperature regulator.

They are manufactured in single-row (Type 10) and double-row (Type 20) models. Closed steel elements with a rectangular cross-section of 70 x 11 mm are used as heating bars, and the distribution and collection bars have an oval cross-section of 50 x 30 mm.

Special brackets (4 pcs) ensuring a safe mounting of the radiator on the wall delivered as standard.

VALVOLE RADIATORI TERMOSTATIZZABILI E DETENTORI RADIATOR VALVES WITH THERMOSTATIC OPTION AND LOCKSHIELDS

Art. 3300-3330

Valvole termostattizzabili pre-settabili.
Disponibili con volantino manuale di regolazione o tappo cantiere.
Pre-settable thermostatic valves supplied with manual handwheel or protection cap.

Le valvole della Serie 3300 permettono di controllare individualmente la temperatura della stanza consentendo un evidente risparmio energetico, inoltre sono silenziose e disponibili per medie e grosse portate.
Le valvole sono fornite con volantino manuale di regolazione ma con semplici operazioni è possibile installare la testina termostatica con elemento sensibile a liquido Art. 9557.
Le valvole sono disponibili anche con o-ring di pre-tenuta sul codolo.

*The valves Serie 3300 individually control rooms temperature and thus save energy; have quiet operation and are fitted to the supply of radiators on two-pipe system with medium and large flow rates.
The valves are supplied with a fully operational handwheel for manual operation of the valve but can be easily replaced with the thermostatic head built-in liquid filled sensible element Art. 9557.
Valves are also available with o-ring on tail piece.*

Certificazioni / Certifications

Caratteristiche Tecniche

Temperatura max di esercizio: 110°C
Pressione max di esercizio: 10 bar
Pressione differenziale: Max. 1 bar
Max. 0,25 bar (Raccomandata per un' operatività silenziosa)
Valore pH: 8÷9,5
Valore Kvs: Vedi tabella
Filetto testina termostatica: M30x1,5
Utilizzo: Acqua per impianti di riscaldamento

Technical Features

Maximum operating temperature: 110°C
Maximum operating pressure: 10 bar
Differential pressure: Max. 1 bar
Max. 0,25 bar (Recommended for quiet operation)
pH value: 8÷9,5
Kvs value: See table
Thermostat thread: M30x1,5
Medium: Heating water

TUBO COBRAPEX EVOH COBRAPEX PIPE EVOH

Art.0200

TUBO IN POLIETILENE RETICOLATO AD ALTA DENSITA' CON BARRIERA ANTI-OSSIGENO (disponibile in rotoli di colore bianco)
HIGH DENSITY CROSS LINKED POLYETHYLENE PIPE WITH OXIGEN BARRIER (available in rolls of white color)

Il tubo COBRAPEX a barriera ossigeno EVOH (etilene-alcool-polivinilico) e' prodotto in polietilene ad alta densita' e reticolato per via chimica (reticolazione a silani). La reticolazione del tubo COBRAPEX e' di tipo "b" (PE-Xb); tale processo permette di modificare la struttura chimica del materiale determinando :

- aumento della massima temperatura di esercizio (95°C oppure 110°C per brevi periodi);
 - riduzione della deformazione sotto carico ;
 - aumento della resistenza chimica ;
 - aumento della resistenza ai raggi UV ;
 - aumento della resistenza all' abrasione ed all' urto ;
 - aumento delle caratteristiche di memoria tecnica.
- I tubi si prestano per essere utilizzati sia negli impianti di riscaldamento sia negli impianti per uso alimentare.

The COBRAPEX pipe with oxigen barrier EVOH is made of high-density polyethylene chemically cross linked (silani reticulation).

The COBRAPEX pipe reticulation is type "b" (PE-Xb); this process modify the chemical structure in order to :

- increase the maximum working temperature (95°C or 110°C for short periods);
- reduce the deformation under stress ;
- increase the resistance to chemical products ;
- increase the resistance to UV ray ;
- increase the resistance to abrasion and hurts ;
- increase the technical memory characteristics.

The pipes are suitable for use in heating or alimentary systems.

Per la gamma completa vedere il catalogo /For complete range see catalogue

- A) Strato di barriera anti-ossigeno EVOH
Oxigen barrier EVOH layer
- B) Strato adesivo
Adhesive layer
- C) Strato di polietilene reticolato PE-Xb
Cross-linked polyethylene PE-Xb layer

Normative e raccomandazioni Regulations and recomandations

RADIANT R1K EXTERNAL Heating Only Boiler

Manufactured by:

RADIANT has gone to the head-of-class offering the world's most efficient boilers with AFUE ratings up to 98.8%! Our latest products take efficiency to the next level, coupling the advantages of central boiler systems with the ability to specifically control the level of comfort in individual residential or commercial suites

5 YEAR WARRANTY*

RADIANT R1K External Heating Only Boiler

- Easy Installation
- Compact Size
- Anti-Freeze Protection
- Modulating Pump
- Stainless Steel Heat Exchanger
- Built in Circulation Pump, Expansion tank and Air Bleeders.
- Available in Natural Gas or LPG
- Wifi Compatible
- Service Friendly Design
- Cascade Able Design
- Set Point ΔT Flow-Return Adjustment
- Made in Italy

Magnetic Filter

Fluid Management

Making quality hydronic heating **affordable for you**

SMART EUROSTER
Digital Controls

Hydalux High Quality
Storage Tanks

Australian Hydronics with Rheem Thermal are experts at providing energy efficient hydronic water heating systems. With a wealth of experience behind us, you can be sure you are getting a hydronic heating solution that meets your needs and expectations.

Rheem Thermal's range of hydronic heat pumps are designed and built in Australia. Favourites of the Australian industry, these units are installed and specified where the highest quality of component, design and control is essential.

RHEEM THERMAL RTHH SERIES

- Heating capacity from 10kW to 68kW Delivery
- Temperature of 40°C and up to 65°C
- Ambient air operating range between -5°C to 45°C
- Rheem IQ® digital intelligent control
- Acoustic lined compressor compartment
- Primary circulation pump housed within case for ease of installation
- Full commercial construction including marine grade aluminium case
- Anti-corrosion treatment of the evaporator coil
- Compressor soft start to all models
- Proudly Manufactured in Australia
- Full manufacturer's warranty and factory/service support nationally
- Designed for Australian conditions including cool climate operation

Radiant Panel Heating

ThermaSkirt Heating

Under Floor Heating

Convactor Heating

The Rheem commitment to quality and performance

Rheem Thermal products carry a unique commitment to quality and performance through R&D. Rheem Thermal is recognised as Australia's benchmark. Its quest to provide the highest efficiency is supported by Rheem Australia's Psychometric Test Laboratory, where heat pump design is tested for efficiency, output and robustness for Australian conditions.

Premium heat pumps for your hydronic heating requirements

HYDRALUX

SMARTER HOT WATER

Hydralux is the smart thermal storage vessel built for Australian conditions. Standout quality at an understated price.

Hydralux leads the way in imported high performance thermal storage. Our vessels are manufactured from Duplex 2205 and hold Australian Electrical and Watermark Approvals. Hydralux is designed for ease of installation and endorsed by Wilson Hot Water – a benchmark for Australian customised hot water for over 90 years.

Storage

Single Coil

includes 3kW electric element

Twin Coil

includes 3kW electric element

A quality product from Wilson Hot Water

Features

- Duplex 2205 Stainless Steel
- Polyurethane Foam Insulation
- Painted Metal Outer Case (1000 Litre - Stainless Steel Outer Case)
- 6 x 50mm, 2 x 25mm Fittings (1 x 25mm for PTR)
- 28mm Diameter Heat Exchange Coils
- 32mm Fittings on Heat Exchange Coils
- Large Surface areas for Heat Exchange Coils
- Thermowell Pockets
- 3.0kW Element standard on Coil Tanks
- Watermark Approved
- Australian Electrical Approvals
- Maximum Working Pressure – 700kPa

Nectre MEGA

The MEGA is designed to cover larger living spaces and provide superb warmth from its radiant convection design. It fits well in both traditional and contemporary styles and can even come with an optional factory fitted central heating boiler for sustainable living.

Specifications

Coverage	Up to 340m ²
Heat Output	22kW
Efficiency	62%
Emissions	1.5g
Firebox size	600(w) x 430(d) x 320(h)
Max log width	500
Weight	170kg/ 180kg
Heating style	Radiant/ Convection

*Optional 3 speed fan & central heating boiler

Legs

Size: 760(w) x 540(d) x 826(h)

Pedestal

Size: 760(w) x 540(d) x 826(h)

BurnWise

*All dimensions are in millimeters (mm) unless specified otherwise and are shown without side shields fitted (if available). In the interest of product development, Glen Dimplex Australia Pty Ltd reserve the right to change Mega product specifications without prior notice.

4 Range

Max

flexibility

Reverso HW

The Reverso range consists of 4 product lines to guarantee maximum flexibility in every installation.

The Reverso HW model was created for high-wall installation .

The Reverso BT model is designed for bathrooms but not only, even the installation behind the door distinguishes its uniqueness.

Reverso FS, designed for maximum installation flexibility, Floor standing or horizontal ceiling, right or left connections in a single product, maximum reversibility.

Reverso SM, the low body of the range with its low height is placed in any position.

Reverso BT

12 cm

thinnest

The

Reverso SM

Reverso FS

The Reverso range is the thinnest fan coils on the world market.

With its real 12 cm thickness , for full height is 10% thinner than its competitors in the slim segment.

A feature that distinguishes the machine is the absence of front intake grilles thanks to the innovative ventilation system that improves battery performance working at negative pressure.

Reverso a real revolution in the field of fan coils, not in words but in deeds.
