

RADIK V-POWER

Panel radiator suitable for heat pumps

new!

RADIK V-POWER

Panel radiator suitable for heat pumps

Construction today places emphasis on the energy efficiency of building heating systems. The trend we are seeing is towards use of modern and innovative low-temperature heat sources, which mainly include heat pumps. The greatest advantage of low-temperature heating is its efficiency in using lower operating temperatures.

The innovative **RADIK V-POWER** panel radiator ensures efficient heating in low-temperature heating systems. Its unique nature lies in the integration of fans and an autonomous controller directly into the radiator. It can be used without ventilation or at one of five levels of intensity of forced convection. The integrated fans **increase the heat output of the radiator by up to 60%**.

The new **RADIK V-POWER** panel radiator can also be used during the summer months. In passive cooling mode, the radiator is able to work with cooler water, which some types of heat pumps can supply to the heating system to cool the building. The **RADIK V-POWER** is supplied in type 22 with heights of 524, 624 and 924 mm and in standard lengths from 400 to 2 000 mm.

The unique design of the separate module with fans and integrated regulation allows for **retrofitting on older types of KORADO radiators** with the same dimensions as those which the **RADIK V-POWER** is supplied in. This will in particular be appreciated by heat pump users who, after replacing their gas or fossil fuel boiler, need to achieve increased radiator output at lower water temperatures.

Suitable for heat pumps.

It contributes to savings thanks to low temperature operation.

Integrated fans increase the output by up to 60%.

Heating and passive cooling.

Module for retrofitting of older types of KORADO radiators.

Very silent operation, suited for sleeping.

- Possibility of adjusting the heat output of the radiator according to user requirements.
- Automatic control of heating or passive cooling of the module with fans thanks to temperature sensors monitoring the temperature of the radiator and the ambient temperature.
- The universal design of the radiator allows for a variable method of connection.
- Maximum safety thanks to 12 V voltage.
- Efficient use of the thermal energy emitted by the radiator thanks to low input temperatures ensures energy savings and thermal comfort.
- Modern radiator design suitable for all types of interiors.
- Low power consumption from 4 to 15 W.

RADIK V-POWER

Technical parameters

Description

The **RADIK V-POWER** model is an innovative panel radiator in the PLAN version with a flat front panel and integrated module with fans which increase the heat output by up to 60%. Its design is intended for low-temperature heating systems, most often heat pumps. It allows for connection to the heating system from the bottom middle, bottom right, left or right side. Two upper and lower fixing hangers are welded onto the back of the radiator. Radiators with a length of 1 800 mm or more have six fixing hangers welded onto them.

Technical data

Height H	524, 624, 924 mm
Length L	400, 500, 600, 700, 800, 900, 1000, 1100, 1200, 1400, 1600, 1800, 2000 mm
Depth B Type 22	102 mm
Connecting pitch	50 mm
Connecting thread	8 x G 1/2 inside
Highest allowed working pressure	10 bar
Operating temperature	17 ÷ 60 °C
Radiator connection	bottom middle, bottom right, left or right side connection

Overview of types

Type 22 V-POWER

Some of the ways of connection to the heating system.

All parameters are laboratory-tested.

RADIK V-POWER SET

Solution for additional installation

The **RADIK V-POWER SET** is a kit for retrofitting to radiators. It is also compatible with older KORADO type 22 radiators up to a length of 2 000 mm. This set can be used by all users who have replaced their heat source. The kit contains all of the components needed for installation and operation.

The set contains:

- 1 ventilation unit
- 2 temperature sensors
- 3 power supply connector
- 4 power supply adapter – 1,2 m
- 5 flat front panel
- 6 accessory for mounting on the radiator

Optional (recommended) accessories:

- 7 side panels
- 8 extension cable

Installation
on the existing
radiator.

Various colour options are available for new RADIK V-POWER radiators and SETS. You can choose from KORADO as well as RAL colour card.
